"Howdy" Engineering Team of the USS Heimdall NCC-1793 – Region 01

Welcome to the T.E.L. November 2023, "CEO His Eyes Open"

2024 is just around the corner, I hope its been fed already because 2023 has been feasting on many of us and sitting down is getting difficult,,,, ? Too Much? It is said "That which does not kill you makes you stronger" ok but every now and then can we have a moment more resembling "The person with the marsh mellow gun – makes us smile". Well lets jump in shall we, what an amazing month October has been.

From Heimdall Halloween, to STARFLEET Academy, Tribbles on the loose to SPACE 1999, Trivia to Zoom you are going to find a lot of content this month. So please forgive the short introduction, grab the popcorn and lets roll. Engineering awaits.... (Editors note, Our Quadrant Updates will return in December)

INDEX

- 2 Roster & Calendar
- 3 Chief Engineer's Update
- 4 / 5 Engineering Reports
- 5 / 7 Crew Articles
- 8 SFA Awards & Info
- 9/10 SFA Graduates
- 11 Halloween, IDRPs,
- 12 Zoom, Trivia, Wrap Up
- 13 Recruitment Flier

Heimdall's Halloween Extravaganza Was a "Blast from the Past"

SD: 202310.29 - Monthly Engineering Report - CEO/FCAPT Darrell Millner

/Computer begin recording /

I'll be meeting with XO Smith later today, and I can only hope Willy doesn't say the Heimdal is no longer welcome at DS9, or worse yet call it an interstellar incident. Admittedly with all the guest on the station, so many vessels, and us arriving in the middle of the Bajoran "LaluBel" festival, it was easy to overlook many of the surprises. Who knew 'Lassie' would get loose on DS9, attempted to drink liquid out of a strange bucket, (not sure how it got into the security officers quarters), but it was NOT appreciated. CSO Davis is apparently debriefing PO3 G. Burley and I will be updated later today. How something so cute could cause so much mischief is amazing.

Been reviewing reports regarding SFA remote learning activity, darn proud of Engineering again this cycle. A total of 30 courses, 2 Boothsby Awards and a BOCP Certificate and as reported by CO Smith in the Monthly Status Report (MSR) several other departments on board have noted increased activity in SFA as well. This reflects greatly on the entire Heimdal crew. On a personal note, I just took a look at my records from this week one year ago, and in the past 365 days I'm excited to say I have completed over 265 individual courses in more than 29 schools, bringing my total to 307. I know this is not a SFA record based on discussions with fellow students from around the globe, but definitely a personal best for me. I think I WILL have another score.

Reading over some internal communications, I am a bit concerned about CMDR Henderson. Medical reports he is stable and continuing to undergo treatments. He continues to be in Barbara and my thoughts as are his family. Truly hope he is up and about for some of the upcoming festivities on board.

I am pleased to report in my role as Region One, Regional Department Chief of Engineering that the comm traffic continues to flow, the program continues to expand, and the requirements do not tax me to the point of interfering with my responsibilities and role as Chief Engineering Officer here on the USS Heimdal. Don't get me wrong, sometimes at the end of the month between RDC reporting, The Engineering Link (T.E.L.) publishing, RainCon submissions, Department reporting, SFA & SFA reporting, and Interdepartmental Role Play I don't always know if I am coming or going, but I am continuing to enjoy the ride - Warp 3 and steady.

Let me wrap up with this, as a crew we had a great Halloween party this month (see page 11), Phaser Sim (Paint Ball led by Carl and Bonnie) (See RainConn), and more. As we launch into November I hope we all remember to be Thankful for all that we have, including the challenges that make us stronger, /end/

Fleet Captain D. Millner, CEO
USS Heimdal Chief Engineer
R1 RDC of Engineering
STARFLEET Marine Corps Reserves
SFA Red Squad

**SD: 202310.27 – Monthly Engineering Report – CDR Bud Walker**

/begin/ Captain, I am happy to report that Operations is now functioning at peak efficiency. I have completed the orientation training for my counterparts on the other shifts, as well as backup officers. As the unofficial leader of this section of the Engineering Department, I have been pleased at how well everyone has worked together and how easy it was to integrate into ongoing ship functions. I see the purpose of Operations as supporting all other ship functions and helping everyone achieve their goals.

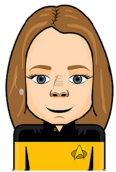

While it was a little sad to say goodbye to my colleagues in logistics, I was delighted to be able to tell the computer folks in the Science Department that I will be continuing in my liaison duties. To that end, I have decided to seek certification as a Science Officer in the Bridge Officer Certification Program. I feel this training will allow me to better understand and thus work better with the folks in Science.

Now that I have more free time, I have resumed my studies with StarFleet Academy. I am continuing my pursuit of a bachelor's degree in Intelligence Operations Studies. I have enjoyed the intellectual pursuit involved, something that I never received from my original home. And I was surprised to receive a Boothby Award (Silver)! That was unexpected and a pleasant surprise.

On the personal front, I sat down with Lieutenant T'Ploth and my fellow acolyte in learning the Keethera. His name is Lieutenant (j.g.) Stok and he is in the chemistry section of the Science Department. He was surprised that I pronounced his name correctly, given that most humans tend to say "stock" instead of "stük." When he asked me about this, I told him that I had spent some time on Vulcan. I could almost feel T'Ploth's quick glance my way but I kept my eyes on Stok. Vulcans are ever perceptive, and I am sure he could tell that something was being left unsaid, but he just raised an eyebrow and said, "indeed."

T'Ploth gave both of us a manual entitled, "Draw Me Into Your Logic, the Keethera Exercises." I asked why she had replicated actual books for us as opposed to using PADD's, and she told us that it was part of the discipline. That the manipulation of a physical book, with physical pages, was intended to have a focusing effect on our thoughts. I noted that my version was in Federation standard as opposed to Vulcan, which I was silently thankful for. While I can make my way through the Vulcan language, I am not a natural linguistic. She instructed us to begin reading the manual and that we would attempt our first Keethera next month.

I look forward to our next Departmental meeting as I grow more and more comfortable being around other people. Your team is a collection of good and talented people and I am glad to be a part of that. /end/

**SD 202310.26 – Monthly Engineering Report – LT Lyon Jody**

Sir,, Another month filled with new experiences and opportunities on the Heimdal. Who would ever have thought that at my age there would be so much that is new? Each day I wake up with anticipation and excitement about what is to come. I don't want to be anywhere else. So, when you offered a leave on Deep Space Nine when we docked for materiel and staff transfer, I was not surprised that I didn't leap at the opportunity to "go home." I was comfortable here and did not want to run into any old friends who thought my decision to join Star Fleet was wrong. For me and Bajor. But after a talk with crewmates at our weekly Engineering get together, I was encouraged to return.

From the moment I stood with Commander Lyon and watched the wormhole open, I knew I had made the right decision. I am Star Fleet but also Bajoran and must honor all parts of myself. I completed my duties and immediately contacted old colleagues on the planet. After some initial awkwardness, we made arrangements to meet. I was given a tour of the new memorial garden complex. It was overwhelming and beautiful. I knew it was something that was discussed but had no idea how far that initial proposal had come. Perhaps more of the plans of Bajoran reconstructionists will be realized in the near future. > Continued

SD 202310.26 - Monthly Engineering Report - LT Lyon

Jody

> Continue

In your Destination Alert you mentioned a festival may be underway when we arrived on station. I packed all my religious items and garb in order to be prepared for a Bajoran feast. Imagine my surprise when it turned out to be a Bolian Holiday Celebration. I should have checked first. It was LaluBel, the weeklong event focusing on family. Food, art, and flowers highlighted the promenade. It was so colorful and bright. Such a contrast to the Cardassian tone of the station.

I am so glad that I took you up on the offer and that I made contact with old friends. I have a little more piece of mind about the state of my homeworld.

SD: 202310.26 - Monthly Engineering Report - CMDR. Zak Lyon

/begin/ Sir, Thank you, sir for approving my request to go to Deep Space 9. The 24-hour leave allowed me to have enough off-duty time to take in some of the sights. I thought that it would be impossible to get much done besides the work I was assigned. However, we were done in short order and the runabouts were transferred without incident. When cataloging the craft, I noted the designations were all Earth rivers. I understand the naming convention was the Commanding Officer's decision. Sounds like a Jeopardy category if you ask me. "Ken, I'll take earth rivers for 1000 credits." Wow, I am such a geek. Can I possibly think of a reference from the last three centuries?

The job accomplished, I was on my own to explore. I had been at the station before, but was working most of the time and never had the chance to familiarize myself with the sights and sounds of the station and Bajor. The first time that I was on DS9, they were just getting a few things up and running. I was able to lend a hand where I could. It was then that I met Operations Chief O'Brien. So, when I ran into him on the way to the famous promenade, I briefly hesitated when he asked me to take a look at what he and his staff had been doing with the operating system. Ultimately, I couldn't resist. And it wouldn't take too much time. The Chief was so proud of what his team had been able to do over the last few months. With plenty of work arounds and jury-rigging he has taken control of the system, but it requires constant monitoring as the full station has not yet been brought on-line.

I don't know how he does it. I am pretty good at listening. And making friends with anybody. And so, it is my personal belief that any two entities can be friends. Given that, I don't know what the problem is with these Federation and Cardassian systems. I swear if either of these operating systems were sentient, they would be trying to strangle each other. Of course, since in Cardassian society men aren't seen as having a "brain for science," an institutional and horrible glass ceiling exists. There is a chance these computers are simply not designed to be understood by males. Hah. By the way, this has to stop. Science, whether theoretical or practical, does not care about gender on any world, at any time. And now I will get off my soap box. Soap box? Must be one of those things that lost its original context over the years.

Having praised O'Brien for his creative and innovative work, I was off for the "vacation" part of my leave.

Again, I appreciate the opportunity to work, learn and have fun on DS9. /end/

USS Heimdal NCC-1793 Engineering Team - Reports End

Engineering Articles

WHAT YOU FIND ALONG THE WAY - CMDR Zak Lyon

I was thinking about the Heimdal's recent musical performance. It was based on a 20th century Earth play that was about sailors on shore leave trying to see everything in NYC "in just one day" as the song goes. I think that was what I was trying to do when I was on Deep Space Nine for just one day.

I felt inspired to be standing with Lt. Jodi when we first saw the wormhole open. What that stands for ... you know...to know you are living in a time where philosophies and faiths are being reshaped around you. >>>

WHAT YOU FIND ALONG THE WAY – CMDR Zak Lyon (Continued)

>>> I can't imagine what that's like to be a part of on a daily basis. I understand she was heading planetside, so I sought out an old friend, Lt. Vilix'pran. Watching him with his growing family, he has six children now, let me see this place as a new community being built from the ground up. It is Federation and Bajoran with a dash of everyone from everywhere. Just the way I like it.

Apart from Heimdal, I have never seen such a family being born around me. Like I said: Just the way I like it.

As Vilix'pran headed off to work he introduced me to the Commander's young son who had an old-fashioned notebook and a request for me. He said that he likes to ask everyone who comes through the station for book recommendations. Oh boy, what to choose. From earth writers? I recommended, just off the top of my head: The #1 Ladies Detective Agency by Alexander McCall Smith. I loved the pictures that book created in my head. He thanked me and said it was a new one. There I go again with referencing something that is centuries old. The Commander's son seems to be a big reader. I hope he enjoys it. I spent a little time talking with him about his favorite books. While we were talking, I was deeply listening. I am getting the vibe of a future writer perhaps.

The first time I was at DS9 I met the O'Brien family. They were relocated to the station from the Enterprise so the Chief could serve as Chief Ops Officer. They were nothing but kind and welcoming to this young cadet on his first assignment. I had never met someone from the Enterprise before. At the Academy, they were viewed as celebrities. The O'Briens were just regular folks. Guess you shouldn't believe everything "they" say. Enterprise crew do know that "there are other ships in the fleet." When I ran into Chief O'Brien on this trip he recommended a great new Klingon Fusion Restaurant which is run by this guy who was, in a previous life, a widely recognized Klingon opera star. The rumor is that something happened with one of the *Violenza Sopranos* in his company. He simply "stepped" away and pursued his other, if not greater, passion as a chef. He never lets the galaxy forget the opera star though. The entire wait staff sings to you during each course. It is thrilling.

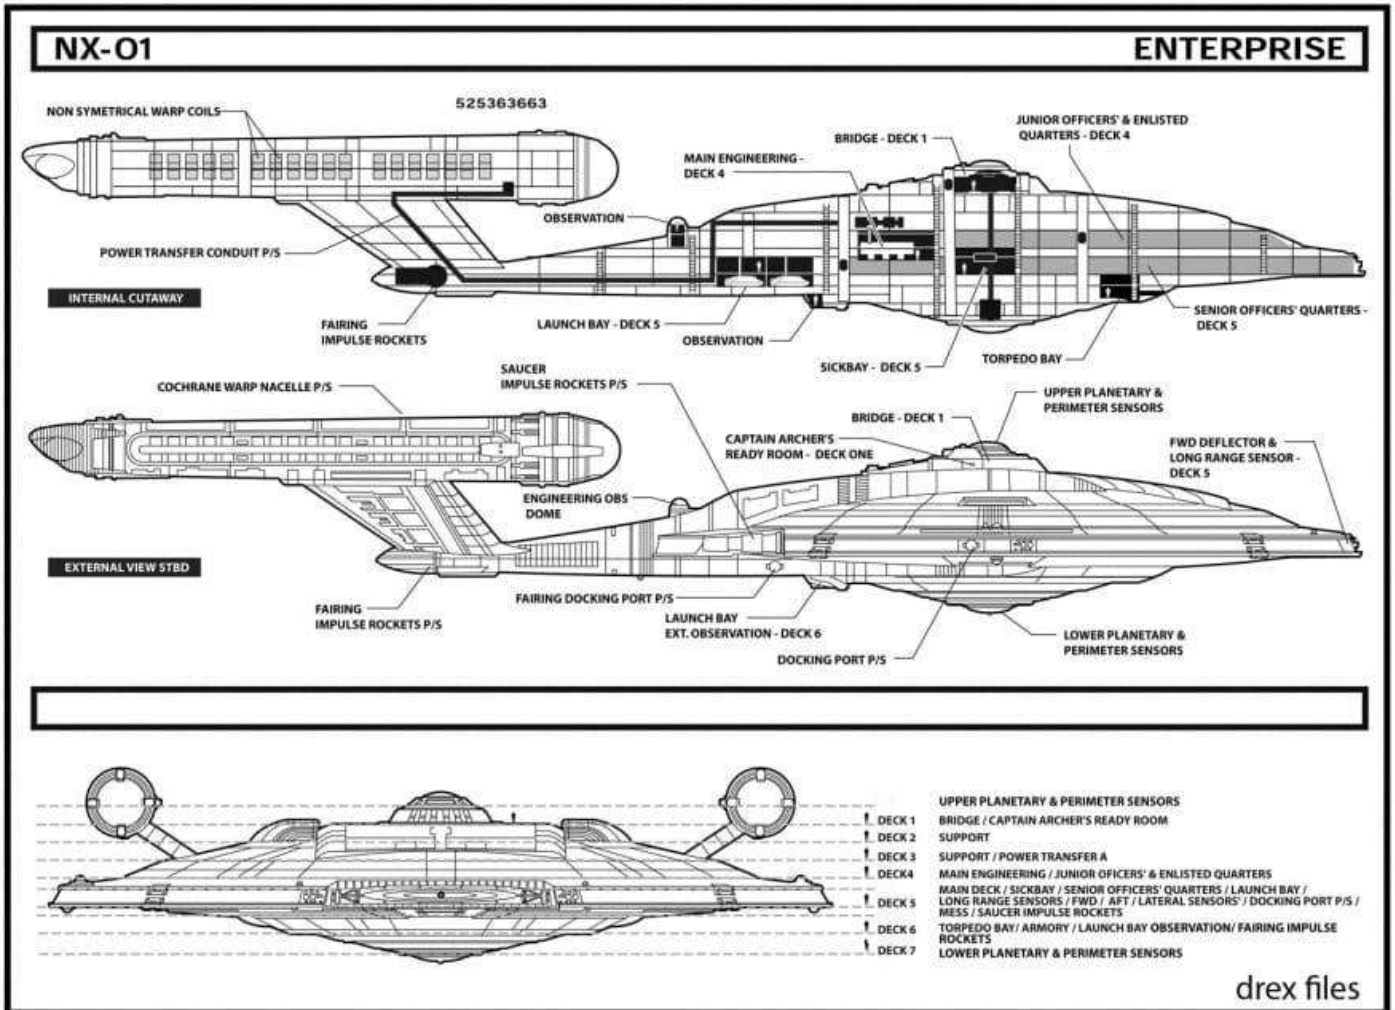

For something a little bit less intense, there is also this family owned Ferengi bar which I have to spend more time in! I only had a chance to briefly stop in. Quarks. You are not going to miss it. Right out front there is this brightly colored logo. I heard that it is actually a portrait of a Tholian Admiral. So beautiful. Don't know the veracity of this story, but it is wild. I think glass is the best way of capturing the Tholian figure.

I never thought I would meet anyone as quiet as Commander Walker, but as I left Quark's I ran into the station's security chief. He takes it to new levels. I met him on my last trip and he remembered me. I think. He has only ever grunted or hmped to me and yet I feel like I am starting to know the depth of his "vocabulary." Maybe I should listen more closely to Bud's non-verbal vocabulary. I think if Commander Walker did end up meeting the CSO they'd probably get along very well! I understand that the CSO still does not know his origin. It's not one of the known shape-shifting species like Chameloid or Vendorian. No conspiracy theories please. I just hope he finds his home one day.

One funny story. The commanding officer is passionate about the long-lost sport of Earth Baseball which is starting to pop up on some earth colonies again. So, one of the common things programed into the replicators is ballpark food. One item is a Strausburger. Apparently the Cardassian part of the system didn't take kindly to that and every time anyone tries to order this it comes with a side of "flies" which is of course not to everyone's taste. It makes you miss shipboard replicators where the worst thing that ever happens is "steaming hot bananas." Kind of like replicator 404. But the Commander is determined to bring baseball and park food to the masses. I understand he himself is quite the chef. Yes, it is that Sisko as in *Sisko's* of New Orleans. Perhaps when the Commander retires, he can open a second location on DS9. Unless he's got something else he wants to do...

This is only the first part of my adventure on Deep Space Nine. I am sure it will take a while for all the stories to come out. I'll keep them coming for a while. This place is strangely starting to feel like a sort of a vacation location for me. And, some of the crew here are already starting to feel like a second family.

What Do We Need To Do As Engineers?

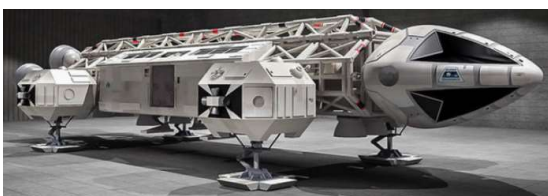

I found myself contemplating the next steps while looking over this image provided by **James McCoy**, CEO of the R1 vessel **USS Gorkon, NCC 40512**. He regularly contributes to the “**STARFLEET Region 1 Corps of Engineers Facebook Page**”. And provides not only technical images but compelling discussions.

Now what do I mean by “next steps”, what technology are we short on that is most vital to creating a similar ship, ok not warp capable per se, but fundamentally what you see here.

These are my thoughts, would love to open the discussion.....

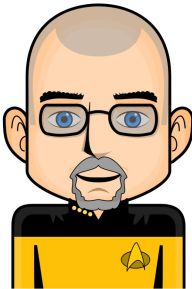

- Inertial Dampeners – I for one do not wish to be pinned against the bulkheads
- Gravity plating – some sort of artificial gravity field to save my coffee if nothing else
- Shields – beyond the metal kevlar mesh and tiles, something that will deflect particles. Think back to Space Pod One on Enterprise, cant be constantly patching holes.

What do YOU think? What am I missing and What do we actually already have? Obviously a building / construction platform in orbit would make a huge difference. Moon base though wonderful might be too far away. Perhaps SPACE 1999 Eagle design would be a good place to start. Let's share your thoughts in the next issue, email trek1793@millnernet.com with subject matter WHAT DO WE NEED Q1.

"The Engineering Link" will not only detail Educational Records for courses completed by its Engineers via STARFLEET Academy, we will also make special note of any Awards received from the same.

CMDR William "Bud" Walker
Bridge Officer Certification Program - Chief Communications Officer
Silver Boothby 0100
 SD: 202310

FCAPT Darrell Millner
Diamond Boothby 0250
 SD: 202310

The Bridge Officer Certification Program (BOCP) is a program for STARFLEET Officers who wish to qualify themselves as command-ready in the department of their choice. This opportunity is not one to be taken lightly. The BOCP was created for members of STARFLEET to become "certified" in their chapter department(s) as a command-level officer. --- It is awarded in the STARFLEET Database as an Academy award. --- This award is earned by successful completion of the program requirements. This involves earning credits in a specific set of courses from the STARFLEET Academy. You must complete and send in the application in order to earn the certification. You may certify in one or more of thirteen (13) different positions, ranging from Flight Control Officer to Commanding Officer. - Participation in this program is entirely voluntary, and is not required to hold any position in STARFLEET. For More specifics visit <https://es.sfi.org/academy/course/index.php?categoryid=30>

Academy Degree Program (ADP) Here is where you gather all the certificates you have earned over the years and earn Academy-wide degrees. Currently there are 17 degree categories from Alien Studies, Intelligence Operations, Space Studies, Science Fiction Studies, and much much more. **Degrees range from Associate (60 courses), Bachelor (120 courses), Master (180 courses), Doctorate (240 courses)** in each of the categories. For More specifics visit <https://es.sfi.org/academy/course/index.php?categoryid=29>

Boothby Award - Based on the number of successfully completed courses in both STARFLEET ACADEMY and STARFLEET MARINE CORPS ACADEMY. Program re-initiated in 2023.

EDITORS NOTE: Using available space to highlight SFA Courses the reader may not be aware of, how many of you have a history in Amateur Radio D.

From 'Pointy Hats' to 'Bald Heads', 'Coast Guard Vest' to 'Tribble Head-wear', 'Four Legged Scientist' to 'Time Traveling Docs,' and 'Camo Cosplay' to 'A Galaxy Far Far Away' I think I even sensed the 'Invisible Man' beside Kathy. Heimdal Engineering as always jumps in with style.

The Heimdal Halloween party was once again a stellar success. From William Wallace to Cyrano Jones, The Addams Family and more. There's nothing quite like a Heimdal Party, even if some of us only got virtual cookies. All went well including the games after the "Short Meeting" nudge nudge, the only challenge that this writer saw was having to choose from so many amazing, creative, and well executed costumes.

Our own **CMDR WALKER** was awarded two of the four medals for "**Best Science Fiction & Best All Around**" for his "Random Imperial Admiral" aka "Admiral Walker" and his mini droid named 'Dark Brandon'

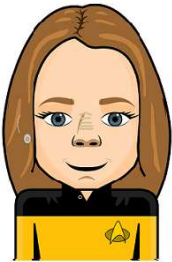

(Even with that belt buckle a' Bud).

Congratulations and Thanks to ALL that participated of course, and Engineering 'Way to Represent'.

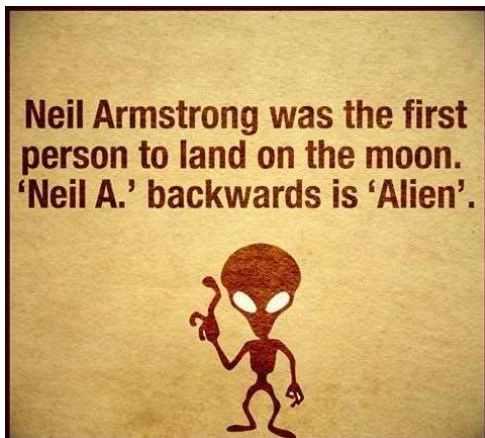

INTERDEPARTMENTAL ROLE PLAY

Engineering - Its about 'Engagement'

Lt. Lyon Jody continues to take a powerful leadership role in guiding our crew through the Mirror Universe. Currently juggling Communications, Security and Engineering participants as we navigate our way through the current dance that is Role Play. She takes the incredible story lines weaved by the crew (and herself) and puts them together in a way that is almost like music - Thank You for all that you do

SD: 202311.20 ED: **November 20th, 2023** 7:00 pm eastern – Normal Meeting*
 THIS SESSION IS FOR CURRENT HEIMDAL ENGINEERING DEPARTMENT MEMBERS

Mark you calander - **3rd Monday** each month Come join **your** Engineering team in a lively discussion about everything from TNG, WOK, Wolf 359, Strange New Worlds, Picard, SFA, Reports, Stories, Tools, Travel, Weather and more. It's lots of things folks, but BORING* IS NOT ONE OF THEM – Money Back Guarantee - Digitally – Face to Face – you may be surprised at how much fun it can be.

There is a distinct possibility we will have a special guest presentation.

Meeting ID: 852 8421 7035 Passcode: antimatter

[Need help with the coordinates, test run, alternatives, email trek1793@millnernet.com](mailto:trek1793@millnernet.com)

Come on folks – we need you!

STAR TREK Trivia

ST: Lower Decks:

In 2380, he served as chief engineering officer under Captain Carol Freeman on the USS Cerritos. What is this character Lt. Cmdr “Andy’s” actual name?

Last Month: ST: TNG: Wesley Crusher left the ENTERPRISE for Starfleet Academy in the fourth season episode 'Final Mission.' Which fifth season episode marked the first time we saw *Cadet* Wesley Crusher? Answer is: The Game

Special thanks to all contributors, readers, Some with inspiration, art, reports, articles and more - W. Walker Jr, J. Lyon, Z. Lyon, K. Whately, L.Whately, G. Burley, CEO Millner
